

HEADMASTERS 

Beautiful, Fashionable, Confidence-Boosting Hair

www.headmasters.com

As seen on: Emilio Pucci, Chloe and Roberto Cavalli ss14.

An intelligent and sophisticated blonde loved by A-Listers Elisabeth Olsen, Rosie Huntington Whitely and Harley Viera Newton this brand new hue is the perfect remedy for over processed highlights. Whether your colour is looking too light or too blocky Beauty Flash Lights will give blondes a new lease of life; this works by trapping lighter pieces between earthy tones for a gorgeous flush of warmth.

This season's stand out colour.

BEAUTY FLASH LIGHTS

A fresh approach to blondes.

This technique concentrates on locking lighter pieces between darker to create shadow mimicking the effect of a beauty light on a photo shoot. No need for a filter; the rich pallet of toasted tones will not only brighten the complexion but also lift and define features too.

A truly bespoke colour; your Headmasters expert colourist will place delicate lighter pieces throughout the hair concentrating underneath and around the hairline brightening, adding volume and movement too. Using Tissue Lights, Balayage or traditional foils enables the colourist to tailor make the colour to your needs resulting in a much more natural, healthy, soft focused blonde.

As hair rules go, pale complexions should opt for burnished browns, soft beige and amber gold while rose gold and deep chestnut are perfect for darker skin tones.

From £98, available nationwide.
