#MASKYOURGREYS

Our recommendation for 1st Greys

While many women embrace their greys, some want to keep them at bay for as long as possible.

So step away from that all over colour or (god forbid that box) it's too extreme.

Clever colour placement means you can keep the shade and tones that suit you whilst keeping maintenance to a minimum and stay looking natural.

But that doesn't necessarily mean going lighter; the expert colourists at HEADMASTERS will add panels of colour a few tones lighter and darker than your natural around the roots to blend your greys in gently - with the lighter pieces directed around the hairline to help highlight your features and keep your hair looking fresh.

Between appointments move your parting, rock a ponytail or use a hair touch up
